ARA, IT'S TECHNICALLY CORRECT, ISN'T IT?
UNNI, SO AM I RUSSIAN?

Anyan's comments:
KGB disappeared with the Soviet Union. U-2's subtle age shows...

In Strikers 1945 3, the Harrier has a bomb ability that calls in a carpet bombing run with b-52's. I've played the game in arcades, but I don't have memories of playing with the harrier.

The freedom fry joke... is kind of really old even for me.
JAS39 is from Sweden so there are some IKEA jokes in political cartoons and such.

I've talked about it before, but the Yak-141 is F-35's distant cousin or something like that. (only the the B type, but there is no ABC separation so...)
